Sarus Crane & Brolga Count ~ Birds Australia Atlas

Date: _ _ _ _ _ _ _ _ _ _ _ _ _

SITE _____ **PAGE NO** ____

TIME START _____ **TIME FINISH** _____ **CO-ORDINATES & datum** _____

TIME	CRANES IN GROUP (number)	SARUS (number)	BROLGAS (number)	SPECIES UNCLEAR (number)	LANDING ON SITE (tick or number or Y/N) *Include birds already on ground at start*	OTHER - EG DRINKING, FEEDING, DISPLAY

To report results ~ please join the Birds Australia ATLAS. On an Atlas Sheet, fill in your totals for Brolga, Sarus Crane and "Crane" (no ID)

BANQ welcomes suggestions, contact us! banq@birdsaustralia.com.au || PO Box 37 Belgian Gardens, Qld 4810 || www.birdsaustralianq.org

SITE **PAGE NO**

TIME	CRANES IN GROUP (number)	SARUS (number)	BROLGAS (number)	SPECIES UNCLEAR (number)	LANDING ON SITE (tick or number or Y/N) *Include birds already on ground at start*	OTHER - EG DRINKING, FEEDING, DISPLAY

This Data Sheet is designed to help Atlassers compile accurate totals for roosts where cranes fly in progressively, and the observer can count and identify them from the viewing point. It's especially useful where effective counting and ID after birds land is too difficult, because ~

● the birds land too far from the observer ● the birds land, then walk into vegetation or out of sight around a point or other feature

If birds take off and fly away from the site after being recorded as "landed", make a negative entry in the relevant species column
