

Shorebirds - Threatened Little Wonders

Join us for a free workshop on shorebird migration, identification and conservation in FNQ

BirdLife Australia is holding this workshop to introduce you to the special shorebirds of FNQ. Learn more about their 10,000 km trip to get here, the threats they face and how we can give them a helping hand.

This whole-day workshop is open to everyone interested in shorebirds and their protection. The workshop includes:

- A presentation by BirdLife Australia's Shorebirds 2020 project manager on the feats of shorebird migration and the amazing adaptations of our resident shorebirds.
- A course and quiz to get you started or refreshed on shorebird ID and counting.
- A field trip to convince you that shorebirds don't all look the same...
- A goodie bag with a starter kit to our nationwide monitoring program Shorebirds 2020.
- Refreshments and light lunch provided.

Greater Sand Plover, Eastern Curlew, Beach Stone curlew by D Ingwersen
